“SENTINEL GSM SYSTEMS”

Price List

Prices as at 1st January 2008

The “SENTINEL SUPER GSM MKII” range of equipment is used in areas where normal radio cannot be used, where radio range is too far, where there is no phone land line or it is vulnerable to attack. We manufacture different OPTIONS which cover most requirements, however, should you have a very specific requirement, then please contact us.

Our SENTINEL SUPER GSM MKII system can be powered by a battery backed up mains supply or by a good amperage car battery. They are supplied with a pre-registered Pay as You Go Card with minimum of £5.00 credit and a pre registered Top Up Card.

OPTION A: GSM MKII CONFIGURED TO TAKE HARD-WIRED DETECTION DEVICES.
