

Radio Security Systems Ltd

“4000 Lite” Price List

Prices as at 1st June 2008

The “4000 Lite” range of equipment has a nominal radio range of 350m when using exterior quality detectors, this range can be increased by using an aerial at your home, or by an RSS-LR Relay (unlike the SENTINEL PRO 6 and 8 range, paging facilities are not available with this relay). Internal detectors have a nominal line of sight range of 100m. This range will be reduced when used in a building.

The “4000 Lite” Fixed Panel Radio Receiver £180.00

Part arm, full arm and off, by keypad on the panel and / or :
